PCC in Mirror **Monitor in Dash**
 Angle A > Angle B

Drivers are trained to check their rear vision mirror

The mirror displays a 4.2" screen showing what is behind the vehicle when reverse gear is engaged. The driver can see if children, adults, pets or objects are in the 'danger' zone. It works in the same way as similar mirrors/cameras that are available as original equipment on a small number of new cars recently introduced to New Zealand.

Dimensions: 275L x 78H x 35D

The location of the rear vision mirror makes it the perfect place to display the Pantera Rear Vision Mirror Camera Monitor as it can be viewed while keeping a natural line-of-sight on the road ahead.

Minimal eye movement required to view the rear view mirror.

Alternative Camera Options

Sizes are in mm

24W x 22D x 20H

Part Number: MCCAM015BKS

25W x 35D x 30H

Part Number: MCCAM058BKS
