

INSTALLATION INSTRUCTIONS

Components

Tools

Special notes

- * Some units have connectors on programming wires(white & brown) and do not require step 3.
- * All remotes must be present, as programming unlinks all previously linked remotes. Previously linked remotes need to be re-linked along with any new remotes.
- * The brown and white wires are for programming remotes only. Do not leave connected.

Program the remote(s)

Locate the white and brown (remote programming) wires near the electric connectors.

1

Disconnect the connector on red wires

2

Strip off about 10mm insulation from the brown and white wires (ignore if connectors fitted)

3

Connect the brown and white wires by twisting, or connecting the connectors (if fitted)

4

OR

Reconnect the connector on red wires.

5

6

Press the "CLOSE" button on the remote **FOR 5 SECONDS**

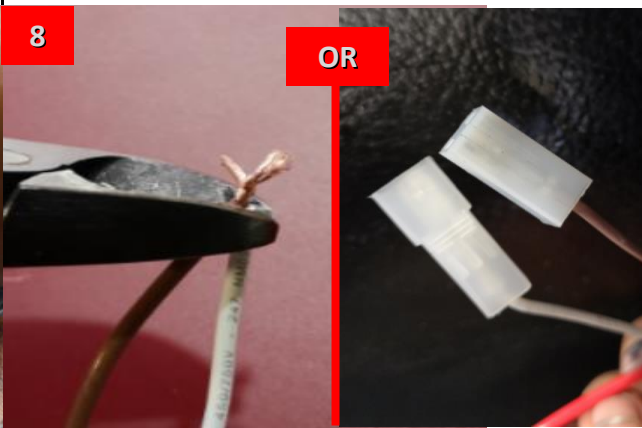

Press the "OPEN " button on the remote **FOR 5 SECONDS**. REPEAT STEP 6 & 7 FOR ADDITIONAL REMOTES

7

Cut the exposed wire of the twisted joint, or disconnect the connectors (if fitted)

8

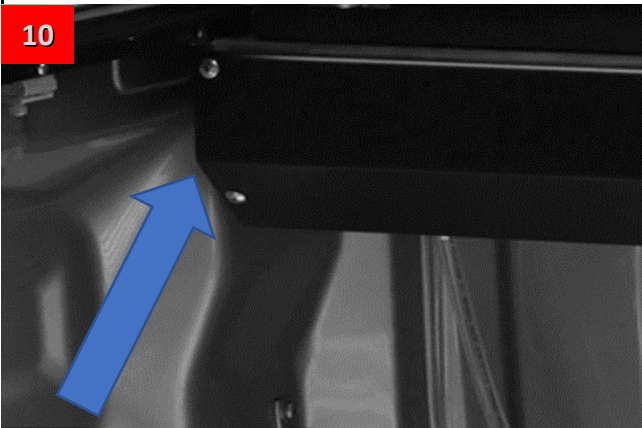

Test operation with both remotes. Repeat the process if necessary.

9

Neatly tuck away wiring.

10
